Department of Mental Health Kolding and Vejle

We are a department of almost 300 employees with room for 94 inpatients and with ongoing treatment of approximately 3000 outpatients.

We educate both pre- and postgraduate students who are studying to be doctors, psychologists, nurses, socialworkers, occupational- and physiotherapists, as well as trainees within the field of short-term healthcare educations. In addition we manage specialist education of doctors, psychologists and nurses.

The department has wards with open and closed sections and a gerontosection. Furthermore we have general psychiatry and special outpatient clinics. These clinics contain:

- Assertive Community Treatment
- A psychotherapeutic unit with treatment for non-psychotic patients
- An intellectual disability team
- Geronto-psychiatry
- An acute team for patients with affective disorders
- A suicide prevention team.

We work in interdisciplinary teams with a strong focus on cross-functional development. In this way, every member of the team can offer their professional competencies to the teamwork.

For support and coordination of projects, we have a development- and research coordinator attached to the department.

Can you see yourself as a member of our team?

We are devoted to our work and constantly strive to become even better at what we do. For this reason, we place emphasis on research, education and development - both within the doctors' group and among psychologists, care personnel and therapists.

But we are not simply a group of ambitious psychiatry geeks; we are also equals as colleagues and people - in relation to each other and to patients and relatives.

If you can see yourself as a member of our team, we would very much like to receive an application from you.

You can count on us to provide assistance with

- intensive language coaching
- finding a temporary residence
- applying for residence and work permits
- good conditions for your partner and children
- and of course a professional and social mentor at the workplace.
